

FG-100

- Temperature:** Continues working at 1022°F/550°C
- Applications:** High tempt. & flame resistant, electric insulation, antiaging, avoiding splahing of high tempt. fluid and dust, water and oil proof, resistant to weak acid and weak alkali.
- Specifications:** Chemical resistant
High dielectric strength
Low thermal conductivity
High tensile strength, no stretch or shrink
Heat, spark and flame resistant, temperature rating 1022°F
- Construction:** Glass Fiber
