Tubing Nylon Material

Nylon Material

Construction

Nylon tube (polyamide) has good physical and chemical and mechanical properties: wear resistance, can be used under the conditions of sand, stone, iron chips; smooth surface, reduce resistance. It can withstand the corrosion of many chemical substances. It has low permeability. Can be used as an insulator; long service life, good temperature resistance

Application

Nylon tube used for transport compressed air, water, oil, chemicals etc. Such as the nylon hose widely used in light truck, air brake hose in car, power steering hose; forklift truck, loading care excavator, crane, ships, engineering machinery and control system line; paint; high pressure liquid resin spraying pipe, air condition, etc.

Temperature

-40° a 100°C
